

# KOHLER®

創新設計 · 突破傳統  
多功能浴室淨 · 暖機

# 產品特色 FEATURES

## 1 創新外型設計 Innovative Product Design

表面採用鏡面玻璃材質，視覺上放大浴室空間。簡約平面設計，方便日常清潔，既實用又美觀。產品設計榮獲德國iF設計大獎。

The design of sleek glass surface is easy to clean. This patents product won the iF Design Award.

## 2 預設時間 Timer

預設時間功能。

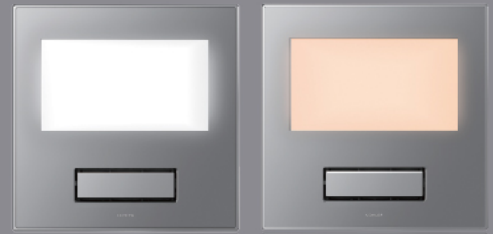

Program all the functions based on your preference.

## 3 設有兩色發光面板 Lighting Function

設有柔和發光面板，有黃光和白光選擇，可因應個人需要調整。

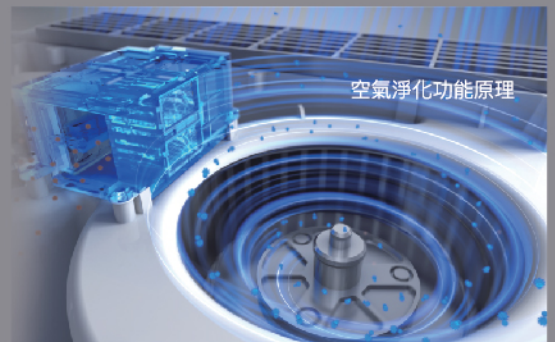

A hidden lighting system lights up your bathroom experience, optional light colors for choice, either yellow or white.

## 4 換氣功能 Ventilation

換氣功能將蒸氣抽走，令浴室不再煙霧瀰漫。設有高效換氣(6小時)與節能換氣(24小時)兩種模式，有效將空氣淨化去除異味。

Ventilation extracts all the steam and stale air with two modes, 6 hours and 24 hours. It is effective to remove the smell.

# 5 智能溫度和濕度監測 Auto Temperature and Humidity Detector

智能監測浴室內的溫度和濕度，並可同步顯示於遙控器上。

Auto temperature and humidity detector synchronize with the remote control, you will have a better knowing of your bathing environment.

# 6 乾衣功能 Dry Clothes

設有冷熱風循環乾衣功能。型號 K-77315TW-G-MZ 可於短短 1.5 小時內把 3.5 公斤的濕衣烘乾；型號 K-77316TW-G-MZ 則需約 2.5 小時。

Dry clothes with hot or cold wind in circulation.

Model K-77315TW-G-MZ can dry 3.5KG clothes in 1.5 hours and model K-77316TW-G-MZ needs around 2.5 hours.

# 7 暖風功能 Instant Warming

暖風功能為您和家人帶來一個舒適的沐浴環境，不會因應天氣的轉變而擔心著涼生病，特別適合家中有小孩、孕婦及老人使用。它使用 PTC 陶瓷發熱，可快速供暖，加熱效能較佳。在 10 分鐘內將室內溫度提升約攝氏 10°C。

隱藏式出風口設計，具有自動擺動及固定風向兩種模式可供調節，可全方位供暖。

Instant warming is achieved by adjustable PTC ceramic heating and presents you a comfortable bathing environment. It is especially good for the family has children, pregnant or elderly. PTC ceramic can increase the room temperature 10°C in 10 minutes.

There are two air flow modes — fixed and swing mode which cover more space of the bathroom rapidly.

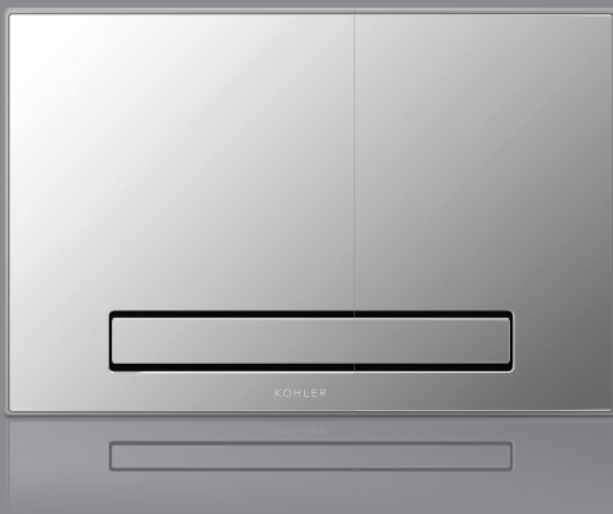

# KOHLER®

## 空氣淨化技術

# AIR CARE TECHNOLOGY

採用頂尖空氣淨化技術，達到空氣淨化功能：防塵及殺菌。

The top technology of air care is a combination of dust elimination and sterilization.

## 防塵功能: Dust Elimination

高效能防塵過濾網可有效過濾PM2.5粒子、一些微細致敏原、香煙煙霧和黴菌，減少空氣中的懸浮粒子的累積，避免直接吸入肺部，對人體造成傷害。

Effectiveness in filtering PM2.5, allergens, smoke and mold allergy, reducing the accumulation of suspended particles, to avoid the direct inhalation and cause the harm to human being.

## 殺菌功能: Sterilization

測試結果顯示可去除空氣中的金黃色葡萄球菌，金黃色葡萄球菌大多通過觸碰到空氣中的皮屑或別人的皮膚而感染，主要影響兒童。它會造成膿胞腫、膿包症、蜂窩性組織炎。如果細菌經由血管流至骨頭、肺部或心臟，就有可能導致危及生命的感染。

The test result shows that staphylococcus aureus can be sterilized. Staphylococcus aureus can spread through the air on skin scales (dust), by skin to skin contact or by touching contaminated surfaces, mainly affects children. Symptoms of some common skin and soft tissue staph infections include boils, impetigo and cellulitis. If the bacteria enters the bloodstream and further to bones, lungs or heart, that may lead to more serious fatal infection.

\*多功能浴室淨·暖機的各項表現會因應實際環境而不同。

The performance of the bathroom heater varies depending on the actual environment.

# 結構圖 STRUCTURE

高性能強化玻璃面板：  
防過熱、防爆裂

**High Quality Tempered Glass Panel:**  
Fire retardant material, anti-overheating, anti-bursting.

陶瓷PTC\* 加熱組件：  
防過熱設計，保護加熱器，避免  
燃燒風險

**Ceramic PTC Heating Components:**  
Anti-overheating design, protects the heater, avoids burning.

金屬外殼：  
即時散熱且不易變形，牢固耐用

**Metal Cover:**  
Heat dissipation, robust and durable.

狀態指示燈：  
橙色：熱風；  
白色：涼風；  
紅色：故障指示、濾網更換提示

**Status Indicator:**  
Orange: hot wind  
White: cool wind  
Red: error indication, filter replacement reminder

防塵濾網：  
累計使用約6個月，顯示濾  
網警報，可輕鬆拆卸清洗

**Dust Filter:**  
LED red light indicates to clean the dust filter after using around 6 months.

過流保險絲：  
電路發生故障，或其他原因造  
成短路，可立即切斷電源

**Current Fuse:**  
Cut off the power if there is any short circuit or error.

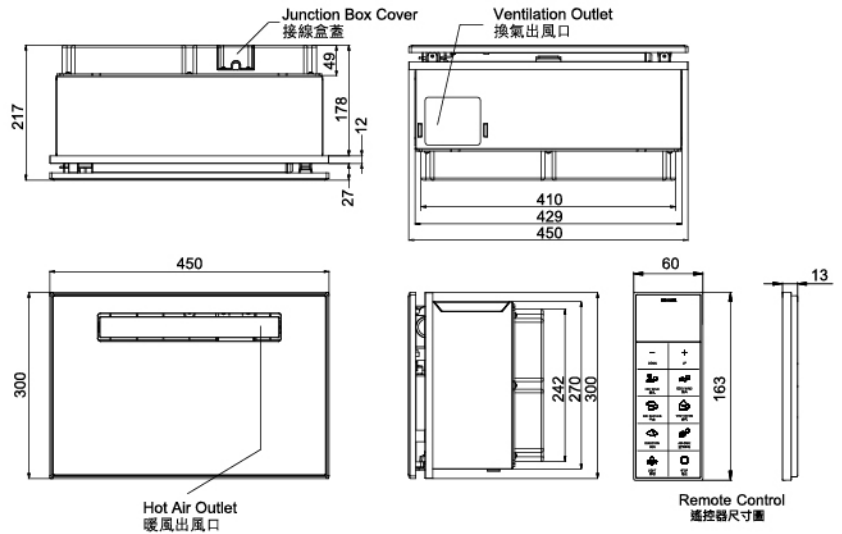

\*Positive Temperature Coefficient 正溫度係數

## 6 SAFETY DESIGNS 大安全設計·為安心使用加分
